(54) Music vending system

(57) The invention relates to a video jukebox vending machine that also dispenses product. The dispenser (30) allows the user to purchase products by either cash, credit or ATM card. The dispenser (30) is connected to analog or telephone lines (48). It further enables a central computer (36) the capability of communicating in either audio, video or data with the consumer on telephone line (48). This allows the customer service representative to receive an identification number (20) by the customer so that graphics or text or audio may be sent to the customer.
